SINGAMANENI SRIRAM

AI Engineer | RAG Pipelines & LLM Integration | Python & SQL
Hyderabad, India | 9550880088 | sriramsingamaneni1@gmail.com

PROFESSIONAL SUMMARY

Analytical and data-driven Computer Science graduate with hands-on experience in Python, SQL, and statistical/predictive modeling. Skilled in data preprocessing, exploratory analysis, and building quantitative models (regression, classification, time-series based feature analysis) to translate raw data into actionable business insights. Experience collaborating on data-driven projects across an AI Engineering role at Abhyanth Solutions and an AI Development Internship at Vodafone, including model development, data analysis, and performance optimization. Strong problem-solving and communication skills, with a consulting mindset for turning data into clear, decision-ready recommendations.

CORE SKILLS

Analytics & Statistics: Statistical Analysis, Predictive Modeling, Regression, Classification, Time-Series Data Analysis, Data Mining, Forecasting Fundamentals, Feature Engineering, Model Evaluation
Programming & Databases: Python, SQL, MySQL, MongoDB, C, C++
Tools & Libraries: Pandas, NumPy, TensorFlow, OpenCV, ChromaDB, Jupyter Notebook, Git, GitHub, Excel
AI/ML: Retrieval-Augmented Generation (RAG) pipelines, LLM integration, Vector Databases
Business & Communication: Data-Driven Decision-Making, Stakeholder Communication, Storytelling with Data, Cross-Functional Collaboration, Problem Solving, Time Management

WORK EXPERIENCE

AI Engineer | Abhyanth Solutions Pvt Ltd *June 2025 – Present*
Full-time | Hyderabad

- Collaborated with frontend developers, QA engineers, and product managers to design, develop, test, and deploy AI-powered applications.
- Worked in an Agile team to deliver AI features, participate in code reviews, and resolve production issues.
- Built and optimized Retrieval-Augmented Generation (RAG) pipelines by integrating vector databases (ChromaDB) with LLMs to deliver accurate, context-aware responses.

AI Development Intern | Vodafone *May 2022 – Jan 2023*

- Analyzed large datasets and built ML models to support data-driven analytics and prediction, translating raw data into actionable insights.
- Performed data preprocessing, cleaning, and visualization in Python to identify key trends and business drivers.
- Applied statistical and predictive modeling techniques, including hyperparameter tuning, to improve model accuracy and reliability.
- Collaborated with cross-functional teams to support AI solution deployment and communicate findings to stakeholders.

PROJECTS

Human Activity Recognition using Smartphones | Individual Project

- Built predictive classification models on large sensor datasets, applying feature engineering and statistical analysis to improve model accuracy.
- Performed exploratory data analysis using Pandas and NumPy to uncover patterns and key drivers behind activity classification outcomes.
- Evaluated multiple models using quantitative performance metrics, documenting methodology and results for reproducibility.

Object Detection using Deep Learning | Research Assistant

- Developed a CNN-based predictive model using TensorFlow and OpenCV for real-time object detection.
- Applied data preprocessing and model evaluation techniques to optimize accuracy and processing efficiency.

EDUCATION

B.Tech, Computer Science and Engineering | SRM University, Amaravati *Aug 2020 – May 2025*
CGPA: 7.3 / 10
Intermediate (Higher Secondary Education) | Narayana Junior College, Ongole *Aug 2018 – May 2020*
CGPA: 8.28 / 10
Secondary School Education | Montessori High School, Ongole
CGPA: 10 / 10

CERTIFICATIONS

- Artificial Intelligence – HackerRank (2023)
- Machine Learning – HackerRank (2023)
- Deep Learning – HackerRank (2024)
- SQL – HackerRank (2021)
- Python – HackerRank (2021)
